

## **Zumbach Electronics equips POSCO Korea Rod Mills with new Diameter Measuring Systems**

Zumbach Electronics of Switzerland won a contract from POSCO Pohang works in Korea for 10 STEELMASTER diameter/profile measuring systems.

These new systems will partially replace existing gauges or complete unequipped locations in the finishing sections of their # 1, # 2 and # 3 rod mills.

All gauges are equipped with 6 ODAC high speed laser scanners (in 6 axes) delivering totally 6000 calibrated measurements per second, as well as with the latest hardware- and software concept. The systems will be fully networked over ETHERNET with POSCO's material flow and Q.C. control system.

The gauges are extremely compact and require close-to zero maintenance.

Delivery of the gauges is scheduled for early 2011

POSCO is operating a number of similar STEELMASTER gauges in the intermediate sections since 2008.

STEELMASTER SMO measuring unit

**December 2010**
